

Q7. Use `Array.reduce()` method to reverse the following given array

```
const arr = [1, 2, 3, 4, 5]
```

A)

```
const arr = [1, 2, 3, 4, 5];
```

```
const reversedArr = arr.reduce((reversed, current) => {  
  return [current, ...reversed];  
}, []);
```

```
console.log(reversedArr); // Output: [5, 4, 3, 2, 1]
```
